### 2024 COVID-19 Booster Vaccination

Dear Buckland Residents/Next of Kin,

In the next few weeks Buckland will be arranging a COVID booster clinic for all eligible residents. Eligible residents would have received a vaccine more than >6 months ago.

The Australian government Department of Health and Aged Care advises that all adults 75 years and older are recommended a COVID-19 vaccination every 6 months. All adults aged 65-74 years are recommended a COVID-19 vaccination every 12 months, and can now consider a dose every 6 months based on their individual health needs.

Regular COVID-19 vaccination is recommended even in individuals who have had a past infection. There are no safety concerns for individuals receiving a COVID-19 who may have had a recent COVID-19 infection.

If you would like to receive the COVID booster vaccination please sign below. Alternatively, there will also be consent forms available for COVID booster shot at reception.

Attached is an information sheet regarding Consent for COVID-19 vaccination for Older people, including aged care residents.

Please sign consent at your earliest convenience and return either via email to [reception@buckland-rv.com.au](mailto:reception@buckland-rv.com.au) or leave at our reception for collection.

If you have any questions please do not hesitate to contact Buckland either by phone 0247522500 or email as above.
